Profile

10 years in a university working as a system administrator, developer, project manager, low and high level technical support on a range of projects with a diversity of stakeholders. A cheerful presence in the office with a vast skillset to back it up, I fix problems and I add value. I'm an effective communicator in high pressure situations requiring rapid resolution and assurance to stakeholders.

I have strong experience in project management and delivery, and I pride myself on stakeholder engagement. My work has been used to demonstrate ideal practice, and I will bring my expertise and breadth of knowledge to your workplace with dedication. Plus, I once cleared six and a half thousand lines in one game of Tetris.
